ABOUT ME

I am a Creative front-end engineer with years of experience in building appealing web applications in front-end web development. I develop and build fully responsive web applications using modern technologies such as JavaScript Es6+, React js, Next js, HTML5, CSS3 and a host of other technologies. Worked with a number of teams to transform ideas into working, production-ready web applications. My Core skills include an exceptional ability to be insightful and always collaborative.

EXPERIENCE

Pharmasev Pharmaceuticals

July 2022- Present

React Frontend Developer

- Working with a team of about 12, I Refactored and Debugged a codebase to increase speed and efficiency.
- Developed about 5 new user-facing features with React, Firebase, Context Api, Axios and React Components.
- Eliminated and resolved issues in product Front End that improved user experience.
- Participated in design reviews and contributions towards product improvement.

PROJECTS

Movie Trailer Site (k-streams.netlify.app)

- A Responsive web App that displays up to date movies consuming themovieDb Api
- Improved efficiency and performance of the site by using Context Api
- Implemented Dark mode Switcher depending on user preferences

Budget Calculator (mybudgets-calculator.netlify.app)

- An innovative web-based application built solely for calculating users' daily expenditure
- Mobile first responsive and functional web app Built using React and Tailwind.

Also cooperated with the design team to translate Figma designs and prototypes into 100% fully functional web pages using React. (getspowse.com, myedushare.netlify.app, tasty-foodies.netlify.app)
