ABOUT ME

I am a Creative front-end engineer with years of experience in building appealing web applications in front-end web development. I develop and build fully responsive web applications using modern technologies such as JavaScript Es6+, React JS, Next JS, HTML5, CSS3 and a host of other technologies. Worked with a number of teams to transform ideas into working, production-ready web applications. My Core skills include an exceptional ability to be insightful and always collaborative.

EXPERIENCES

Freelancing
React Frontend Developer

- Collaborated with a team of UI/UX designers to create websites for small business, and startups hence improving their online presence and customer engagements.
- Transformed UI and prototypes into responsive designs with complex animations, contributing to a 40% increase in revenue and enhanced brand image
- Improved user experiences and optimized web apps/websites speed and scalability by 30%, boosting Users satisfaction and business growth for the organizations and businesses.
- Implemented compelling visual elements and user-friendly design features to drive business growth.

Pharmasev Pharmaceuticals   July 2022- December 2022
React Frontend Developer

- Working with a team of about 12, I Refactored and Debugged a codebase to increase speed and efficiency.
- Developed about 5 new user-facing features with React, Firebase, Context Api, Axios and React Components.
- Participated in design reviews and contributions towards product improvement.
- Provided expert guidance and troubleshooting support, thereby increasing conversion rate from 10% to 60%, driving business growth and customer satisfaction.
- Eliminated and resolved issues in product Front End that improved user experience.

- Built a pixel perfect School dashboard using React Js and Material Ui.
- Improved Dashboard performance by implementing Redux for State management
- Created tables and charts for data presentation using GraphQl and implemented other feature such as pagination, sort, and others to improve user experience.
- Participated in design reviews and contributions towards product improvement for great user experience and performance

PROJECTS

E-commerce Store (*krayastores.netlify.app*)

- An ecommerce store where users can add items to cart and enjoy their shopping
- Implemented three ironclad features that ameliorated performance and user experience by 15% using React, TypeScript and also Context Api for state Management

Movie Trailer Site (*k-streams.netlify.app*)

- A Responsive web App that displays up to date movies consuming themovieDb Api
- Improved efficiency and performance of the site by using Context Api
- Implemented Dark mode Switcher depending on user preferences

Crypto-Currency Statistics (*mycrypto-stats.netlify.app*)

- A pixel perfect website that shows live update of crypto currencies
- User Authentication features was implemented
- Users can keep up with their favorite crypto currencies
- Context Api was used for state management

Also cooperated with the design team to translate various Figma designs and prototypes into 100% fully functional web pages using React

- *getspowse.com*
- *mslockdown.netlify.app*
- *myedushare.netlify.app*
- *tasty-foodies.netlify.app*

EDUCATION

2016-2021| Ahmadu Bello University
B.Eng. Agricultural Engineering.

SKILLS

PROGRAMMING LANGUAGES

- JavaScript,
- Typescript
- HTML
- CSS

TOOLS AND FRAMEWORKS

- React js
- Next js
- Redux/Redux Toolkit
- Bootstrap
- Tailwind CSS
- Git, Github

DATABASES

- Firebase

SOFT SKILLS

- Critical thinking
- Creative
- Communicative skills
- Problem solving
